

Quantitative Genetics for Livestock Breeding (United Kingdom)

Evaluation of Breeding Values

mindmap

```

root((Evaluation of Breeding Values))
  Genetic Variance Components
    Additive Genetic Effects
    Dominance And Epistasis
  Statistical Prediction Methods
    Linear Mixed Models
    Best Linear Unbiased Prediction
  Genomic Selection Techniques
    Genomic Estimated Breeding Values
    Reference Population Data
  Selection Index Construction
    Economic Weight Assignment
    Multi Trait Optimization
  
```
