
Professional Certificate in Space Mission Planning

Why the Global Market is Paying a Premium for This Skill Set

Source: McKinsey Global Institute, World Economic Forum, OECD (2026)

Trend Driver | Why It Matters | Global Source

Commercial Satellite Constellations | The deployment of mega-constellations requires planners who can optimize orbital slots and manage collision avoidance for thousands of assets simultaneously. | McKinsey Global Institute

Lunar and Deep Space Logistics | Upcoming Artemis missions and commercial lunar landers demand experts capable of designing sustainable supply chains for extraterrestrial operations. | World Economic Forum

Regulatory Compliance and Spectrum Management | New international treaties require mission planners to navigate complex legal frameworks regarding space debris mitigation and radio frequency allocation. | OECD
